

# Your Complete End-to-End Telecom Solution

Sabre Industries is the only integrated provider capable of offering an end-to-end solution with both products and services to telecommunication customers across the United States. A leading producer of highly-engineered products for wireless communications, we design and manufacture towers, shelters, tower accessories, modification components, and small cell and DAS infrastructure along with mobile/disaster recovery products. Our services group completes the solution by providing a full range of infrastructure services including site development, installation, integration, modifications, and maintenance. No matter what your needs may be, our increased capacity, diverse mix of infrastructure products and services, and industry-leading design and engineering capabilities will provide you with a complete telecom solution.

## Facilities

With facilities spread out across the United States, Sabre Industries has the capacity to meet your needs. We have wireless manufacturing facilities located in Sioux City, Iowa; Alvarado, Texas; and Bossier City, Louisiana. Our new, state-of-the-art Iowa and Texas plants manufacture engineered structures, while our Louisiana plant manufactures a variety of engineered products. These three plants combined provide a total of 1,159,200 square feet of manufacturing and related facilities. In addition to manufacturing, we have service facilities spread out across the United States. Headquartered in Champaign, Illinois, our team of service professionals has more than 150 years of combined experience. Along with offering in-house equipment integration, Sabre has more than 50,000 square feet of indoor and 175,000 square feet of outdoor warehouse space providing full service shelter storage with capacity for up to 100,000 lb. shelters.

# Capabilities

Sabre Industries designs and manufactures tower and monopole structures; shelters and buildings; small cell and DAS products; and tower components. In addition, we offer a full line of mobile, panelized and field-erectable products. Offering a complete end-to-end telecom solution, our infrastructure services include site development; tower construction; integration; inspection services; modifications; microwave design and deployment; DAS and small cell deployment; warehousing; shelter storage; generator installation and refueling; and site maintenance. With manufacturing facilities, service centers and field offices throughout the United States, we have the in-depth experience and expertise to be your complete resource.

Sabre has the in-depth experience and expertise to be your complete resource.

Sabre designs towers, shelters and components for nearly all applications.

### Engineer and Design

We are one of the largest tower and shelter manufacturers in the world.

### Manufacture

Sabre works with you to identify and develop your wireless site.

### Site Development

We offer everything from tower erection only to full turnkey construction.

### Install

Our tower inspection program allows for customer data reporting and interaction.

### Inspect

We provide value-added services for your facility's life cycle.

### Maintain

## Engineered Telecom Structures

As one of the largest tower providers in the world, Sabre manufactures thousands of tower structures every year. Providing towers for nearly all applications, we offer a full line of engineered telecom structures, including self-supporting and guyed towers, monopoles and concealment products. Our in-house, experienced, structural engineers are licensed in all 50 states, Puerto Rico, the District of Columbia, and Guam; and are capable of certifying a wide range of structures. We offer guyed and self-supporting towers with tubular, solid-round or angle legs, and slip-sleeve or flanged monopoles. In addition to providing new structures, Sabre has the experience and capability to design, fabricate and install tower and monopole modifications. Optimized for ease of installation and minimum interference with existing mounts and lines, our tower upgrade components are designed to fit the first time.

Sabre manufactures thousands of tower structures every year.

# Engineered Telecom Products

Sabre Industries provides a wide variety of engineered products for the telecom industry. As one of the largest shelter providers in the United States, we design, manufacture and integrate a full line of enclosures including concrete, steel and SIP shelters. Custom designed to meet local building ordinances or other stringent requirements, alternate finishes are available such as stamped brick, stucco and vinyl siding. Our engineering department supports your requirements in addition to providing value engineering and seamless integration of our products into your projects. For emergency and disaster recovery operations, we also provide a full line of mobile, panelized and field-erectable products.

We design, manufacture and integrate a full line of enclosures.

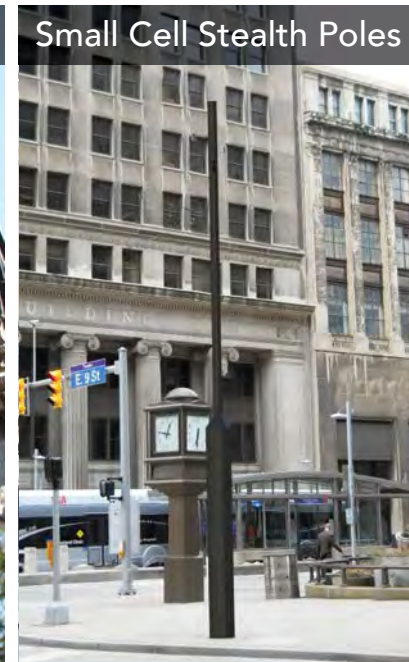

# Components and Small Cell Solutions

In addition to manufacturing macro towers and buildings, Sabre's engineered products include pre-engineered lightweight towers and tower components. Our antenna mounting systems are designed with nearly 40 years of experience in the tower industry and meet today's technology requirements. Dedicated to providing the telecom industry with a true end-to-end solution, we also design and manufacture small cell and DAS infrastructure that includes stealth poles, NEMA 3 and 4 cabinets, ground furniture, shrouds, and other related components. Sabre's product line undergoes extensive structural, thermal, acoustic and RF testing to ensure our customers' infrastructure deployments meet all required jurisdictional and OEM specifications.

Sabre provides tower components and small cell solutions.

## Infrastructure Services

Sabre Industries offers a full range of infrastructure services. With extensive experience in the construction of telecommunication systems, we provide complete site development and turnkey construction. We have the ability to oversee everything from foundation and tower installation, to antenna and line installation and testing. With ample warehouse space spread across our various facilities, we offer shelter storage and staging, along with decommissioning and equipment harvesting. In addition, Sabre offers material/warehouse management solutions that are ideal for site builds, maintenance equipment or emergency response. We also offer complete microwave systems including synchronization and network management. Providing you with integrated solutions, Sabre's on-staff technicians perform factory installation and testing of power and radio cell-site equipment.

Sabre Industries has extensive experience in the construction of telecommunication systems.

## Life Cycle Services

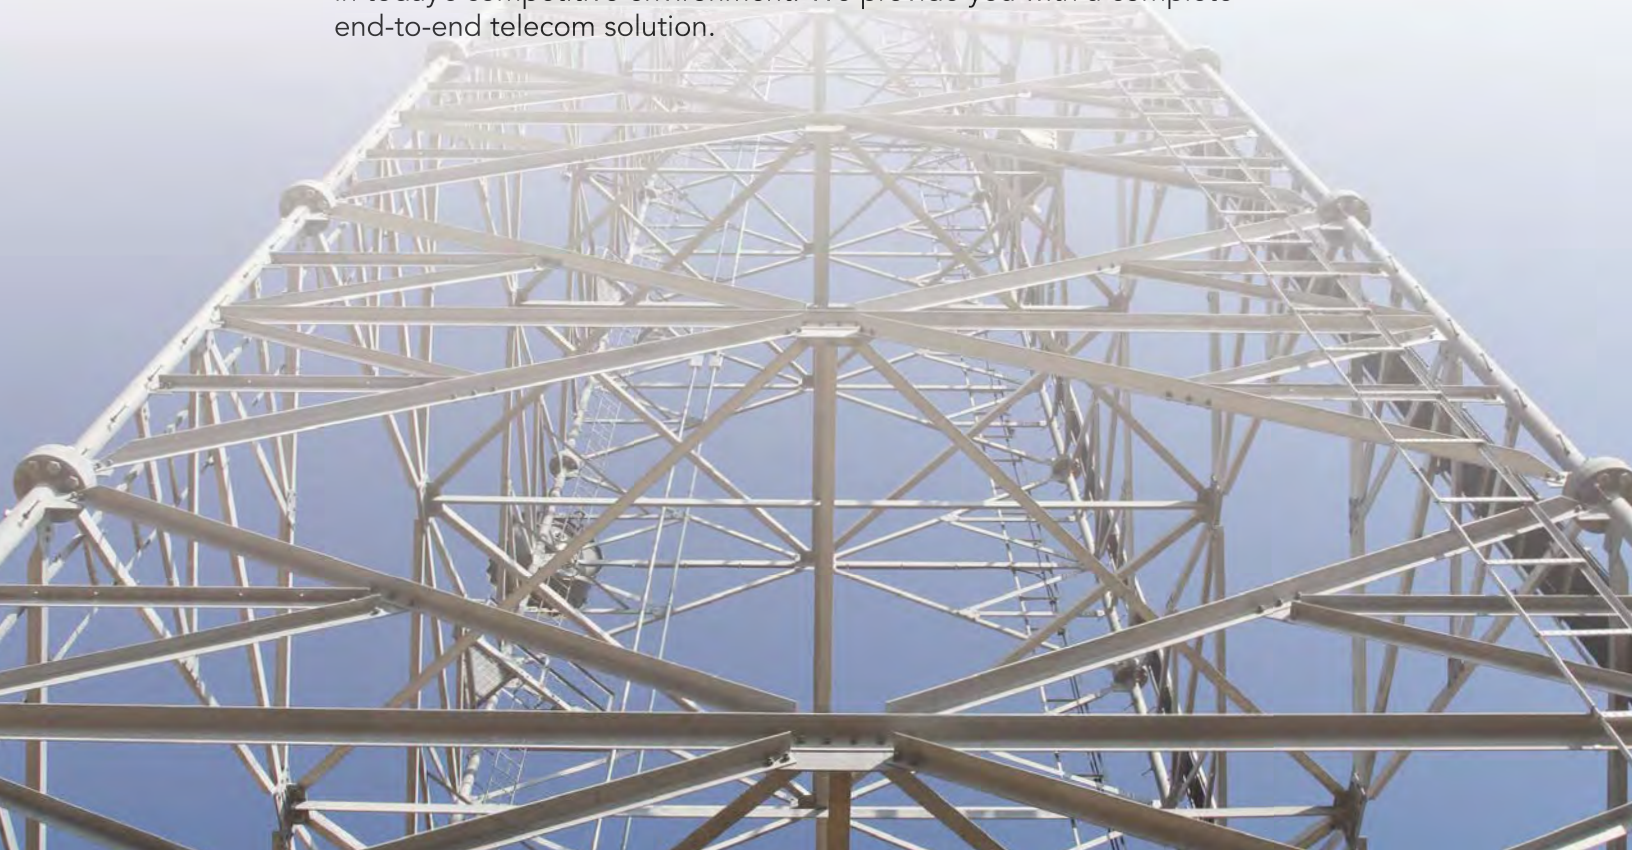

Providing services for the entire life cycle of your facility, Sabre offers everything from new construction to renovations and upgrades. We provide preventative and on-demand repair and maintenance on HVAC, CEV, and electrical and plumbing. Utilizing our custom-developed inspection software, we offer tower inspections that include tower, site and equipment conditions. If a tower needs to be upgraded, Sabre has the ability to provide complete tower and monopole modifications. In addition to maintaining current facilities, we design, deploy, and commission small cell and DAS solutions. With a long history of quick response to carrier emergencies, our expert service teams are ready to respond 24/7/365. We have the ability to provide temporary tower and generator deployment, along with emergency structure and equipment repair. Sabre offers emergency generators along with five different refueling programs to ensure that your equipment continues to run in the worst of situations.

We provide value added services for the entire life cycle of your facility.

# Your Partner from Beginning to End

Sabre Industries is your partner from the beginning to the end of your facility's life cycle. From towers to buildings, to modifications and maintenance, we lead the telecommunications industry in both infrastructure products and services. With manufacturing facilities, service centers, and field offices throughout the United States, we have the in-depth experience and expertise to be your complete resource. Only Sabre can deliver the kind of quality and reliability you need to succeed in today's competitive environment. We provide you with a complete end-to-end telecom solution.
