SOLUTIONS
FOR WIRELESS
COVERAGE AND CAPACITY

SMALL CELL SMARTSTACK™ POLE

A part of our SmartStack™ product line, the SmartStack™ monopole is a sleek, modular radio and power integrated pole solution which aesthetically blends into the most challenging environments.

DESIGN FEATURES

- Designed in accordance with requirements of TIA-222, GR487, NEMA, and other standards and specifications as required
- Highly configurable mounting options for multiple remote radio heads & small cells
 - Partial or full concealment of radio equipment depending on cooling needs
 - Door & fan alarms for remote monitoring
 - Multiple antenna interfaces allow for optimal RF configuration

PRODUCT SPECIFICATIONS

- Diameters ranging from 12.75" to 24" available based on equipment, thermal performance and configuration requirements
- Standard height options from 20' to 40' AGL – other heights available upon request
 - Power bay and Radio bays, with customizable options available
 - Pole top to antenna transition region to mask the antenna mount, leaving an aesthetically pleasing finish
- Galvanized, with paint or powder coat finish options, color set by customer specifications
 - Luminary mounting option available
 - Exposed meter base can allow easy inspection
 - Designed to maintain OEM operating temperatures
- Foundation design included based on geotechnical report or specified soil parameters
 - Use with our SmartPier™ foundations system for quicker deployment
